

## Joe Burke

Lighting Design  
 Lymington, Hampshire  
[www.joeburkelightingdesign.co.uk](http://www.joeburkelightingdesign.co.uk)

Joe Burke lighting design create beautiful spaces that people want to use, light that people love to be surrounded in and light that delivers with both finesse and impact through brilliant design, technical proficiency and artistic mastery of light.

The primary role of a lighting designer is to select the right choice of light in order to meet the objectives of a project, client or customer brief. This may be creating the perfect atmosphere or ambience, the need for practical or functional lighting or the introduction of smart home automated technology to make life simpler.

This is achieved every time through invested time and consultation, listening and understanding of our customers' needs and desires. We provide a full lighting design service, which encompasses customer consultation, the creation of all the necessary plans, designs and technical specifications; we can even oversee, project manage and work with any necessary third-party contractors to ensure everything goes smoothly and to plan.

Lighting is one of the most cost effective ways of reinvigorating life, creating rich inviting ambience and lush atmospheres to both your interior and exterior spaces. Our inexpensive lighting design services, which start from just £400, can also add significant value to your property. We work with flexibility in mind and tailor our services to you in order to ensure that you can still get the results you want within time and within your budget. Contact us today, we 'd love to work with you or hear about your project.
